Cass Technical High School

Detroit, Michigan

The Open Door

Since its organization as an elementary school in 1862, Cass has been acclaimed for its progressiveness and usefulness. It has long been a school devoted to training not only in mathematics, science and grammar but in everyday practical situations. Built on land donated to Detroit in 1860 by Lewis Cass, the school regularly educates 13,000 people.

For over forty years, Cass was an academic school. In 1907 due to the efforts of Wales C. Martindal, the technical branch was started. The branch was located on the third floor of what is now Commerce High School. There were originally 110 students and nine faculty members. As industry grew in Detroit so did Cass Technical High School. Businessmen and parents began to realize how advantageous a technical school was. After many fund raising campaigns and several set backs, the present building was opened and gradually occupied in October, 1922.

Since then Cass has continued to grow and expand. The present day school student body numbers over 4,000 pupils, and there is a faculty of at least 300. The school has eight stories in which are located classrooms and laboratories plus an auditorium with a seating capacity of 3,000 and a lunchroom which daily serves over 5,000 people.

Cass is unique, in that, it is the only technical school in Detroit and one of the few in the United States. The school has been identified with scholastic accomplishments, and often graduates obtain jobs because of the fact they did attend Cass. Many of Cass' graduates have gone on to become leaders in their communities and in their respective lines of work. In keeping with the tradition of success, Cass students are given every opportunity to learn and develop skills and aptitudes. They are given the opportunity to reap a wealth of knowledge and to become leaders as those before have done.

We, as Cass students, should extol the merits of our school and be proud that we are Cassites. You may think that this is a difficult thing to do. After all, Cass doesn't have a winning football team, and the school isn't as beautiful as it could be. Cass, however, is more than being triumphant on the football field and 'surface beauty. It is a symbol of hope for future generations, for where there is learning and education there is freedom and democracy.

You may also feel that Cass is no longer an academic leader. If this is true, the degradation can be traced directly to the student body. As explained by Mr. R. R. Baumgartner, assistant principal, Cass has an entrance requirement of a C average intelligence rate, and students are to maintain a C average in their academic courses. But there are many students who sluff off their job of getting an education and just barely pass their classes. Many students want the glory of attending Cass but do not want to work and put forth the effort necessary to attain a measure of success. Most of the failures at Cass are due to lack of interest not lack of ability. To these students who are lowering our school's prestige we should direct an appeal to stand up and grow up and attempt to obtain for our school the admiration and respect it deserves.

Bad as it may seem, the picture is not entirely dismal. Over sixty per cent of Cass' graduates enter college. Cass students are awarded as many scholarships and Phi Beta Kappa certificates as any other school.

Some students who enter Cass with a C average find the competition and pace too difficult for them. Because of this, teachers are faced with the problem of either holding back some of their students or increasing the difficulty for others. This situation is not fair to the teacher or students; so in an effort to remedy it, a recommendation has been made that the entrance requirement average be raised to a C plus.

The question whether the standards and entrance requirements of Cass will be raised is still undecided, but one thing is certain. It is the fact that Cass will continue to give to those students who are sincere the best possible training so that they will be of use to their country, their community and themselves. If we really put forth our best effort, Cass will bestow on us an insight into what life may become and will develop in us the ability to meet and cope with the problems that will be part of our future.

Retirement

Mr. John Donnelly

Mr. Karl Knauss

After long years of struggling with students and checking papers, some of our teachers are retiring this year. They can look back with pride on the time that they spent in the teaching profession, and can make plans for the future. Now they will have time to take a long-awaited fishing trip to Canada, or work in the basement shop, or raise flowers in the backyard. All the leisure time that they wanted when they were teaching is now theirs to use. Some of our retirees may move to warmer climes, some may go to the country, and some may stay in Detroit, but no matter where they go, they have our wishes for long life and good fortune.

Mr. Joseph Bosco

Mr. John Paterson

Mr. Arthur Fountain

Mrs. Emma Lou Rothman

High school should be, and usually are, among the happiest and carefree years of our lives. We cherish the friendships formed. We treasure the memories of happy occasions and important events. We remember certain teachers for their insistence upon tasks and deadlines, others for their deep understanding of boys and girls and yet others for their sympathetic and kindly understanding of our problems and shortcomings.

The story of a high school is admirably told in picture book form in each high school yearbook. That is the real purpose of the publication. The efforts of the yearbook staff are directed toward one goal: The finest and most complete record of the current roster of pupils and more especially of the January and June graduates, that the editors and other staff members can produce. To them and their sponsor, thanks and appreciation for a job well done. A product that will be treasured by each graduate for years to come.

The Cass Art Department's three curriculums—commercial art, costume illustration and arts and crafts, prepares the talented student for an art career that often begins even before he receives his diploma. All students in the curriculum take basic courses in drawing, painting, design, lettering and art history. Courses in illustration techniques, poster graphic design, costume illustration and other crafts are directed at the specialist in his respective curriculum.

If the student wishes to continue his education in art school or college, his training at Cass, which in reality is a college preparatory program including all the required academic subjects in addition to the subjects in his major field, enables him to tackle his program in higher education with confidence; he may even receive recognition in the form of advanced credit.

Reports of alumni successes come back to proud Cass teachers with gratifying regularity.

The Automotive Technology, Astronautical, and air conditioning Curricula provide students with a specialized technical education. Each curriculum includes laboratory, English, social studies, mechanical drawing, chemistry, physics, and mathematics. The student graduates with a college preparatory diploma. Upon graduation he is ready to follow an engineering career or be employed in industry on a technical level at the occupation for which he has been trained.

The laboratory work in the Automotive Technology Curriculum consists of the practical and technical aspects of hand tools, engines, power units, instruments and analyzers, and automotive servicing.

The Astronautical Curriculum covers hand tools, aircraft engines, airframes, welding, aerodynamics, meteorology, instruments, and navigation.

The Air Conditioning Curriculum includes the construction, installation, and servicing of domestic, commercial, and industrial air conditioning and refrigeration units.

Driver Training for Cass Tech is part of the Automotive Technology Curriculum.

what next?

It's a pretty important decision, young lady — choosing the right job. You'll want to work in pleasant surroundings — in light and airy offices with modern equipment.

And now that you're out of school, you'll expect to meet new friends where you work — young people you'll like and with whom you can enjoy your leisure time. (And how about a vacation with pay?)

Then there's the matter of a paycheck — it'll be nice to count on a steady income, a salary that's good from the start and keeps getting better with regular increases.

There's a job like this waiting for *you* at the telephone company!

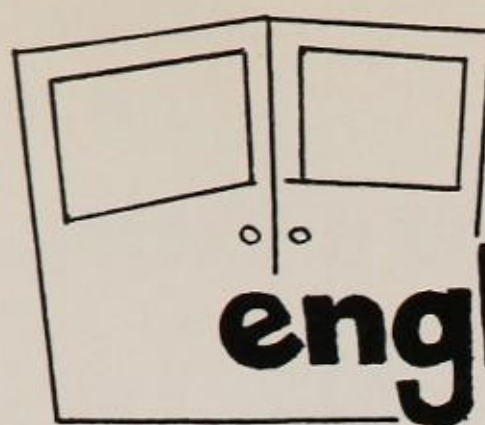

You might want to be a telephone operator or a teller, a cashier or a clerk — those are just some of the many interesting jobs Michigan Bell has for bright young high school graduates like yourself. And there's a chance to advance in all of them.

You don't need experience to get a telephone job, and you'll earn a good salary, even while you're learning.

What next? Why not visit Michigan Bell's Employment Office? We'll be looking for you!

The Mechanical Manufacturing Curriculum has been designed for those students who are interested in becoming mechanical or industrial engineers, automation technicians, or tool and die apprentices. Shop experience on such machines as lathes, turret lathes, shapers, milling machines, surface grinders, and universal tool and cutter grinders is offered, as well as shop and laboratory experiences in foundry, drafting, metallurgy, physics, and mathematics.

The Mechanical Drafting Curriculum has been developed for those who are interested in becoming engineers, designers, or draftsmen. The curriculum provides opportunities for all types of drafting experiences leading ultimately to design problems. Foundry, machine shop, metallurgy, physics, and mathematics are other areas which round out the background.

The Architectural Drafting and Building Curriculum provides experiences for the student in drafting and building. Building construction details are assembled in the shop—plans are drawn up in the drafting room. The student ultimately can design a complete residential outlay and also be familiar with the building construction involved in the project. Supplemental courses in art rendering, physics, chemistry, and mathematics complete the program.

Dept. Head

This curriculum is designed to give a broad knowledge of the fundamental principles of the electrical as electrical trades. A student who graduates from this curriculum is well qualified to take a job as a preferred apprentice or journeyman helper. He may also go to college, providing his marks are of a high standard.

The graduate may specialize in any of the following: contracting of electrical installations, radio television, radar missiles, industrial electronics, automation as well as any of the hundreds of related fields.

The Home Economics Curriculum is unique in that it provides an opportunity for students to prepare for immediate employment in commercial foods establishments, department stores, doctor and dentist offices, hospitals and laboratories.

On the other hand, for the girl who wishes to further her education in a professional career it is an excellent foundation for: teaching, nursing, retailing or social work. Then too, opportunities are endless for those interested in becoming professional home economists. There are continuous demands for people trained in commercial foods, communicative arts, dietetics, clothing, and design, interior decoration, and research.

CONGRATULATIONS, GRADUATE! The day you receive your diploma for a job well done will soon be here. May we, at Michigan Consolidated Gas, join with family and friends in wishing you continued success and happiness. Whether the road ahead leads to college, a career or marriage, we hope, some day in some small way, that we may serve you.

MICHIGAN CONSOLIDATED **GAS** COMPANY

So much more for so much less—**GAS** *naturally*

**LIVE
HAPPILY
EVER
AFTER—**

ELECTRICALLY *Are you coming back for more education?*

Getting a job? Establishing a home? What's all this got to do with electricity?

Just this: Whatever the future brings you, electricity will be there to help.

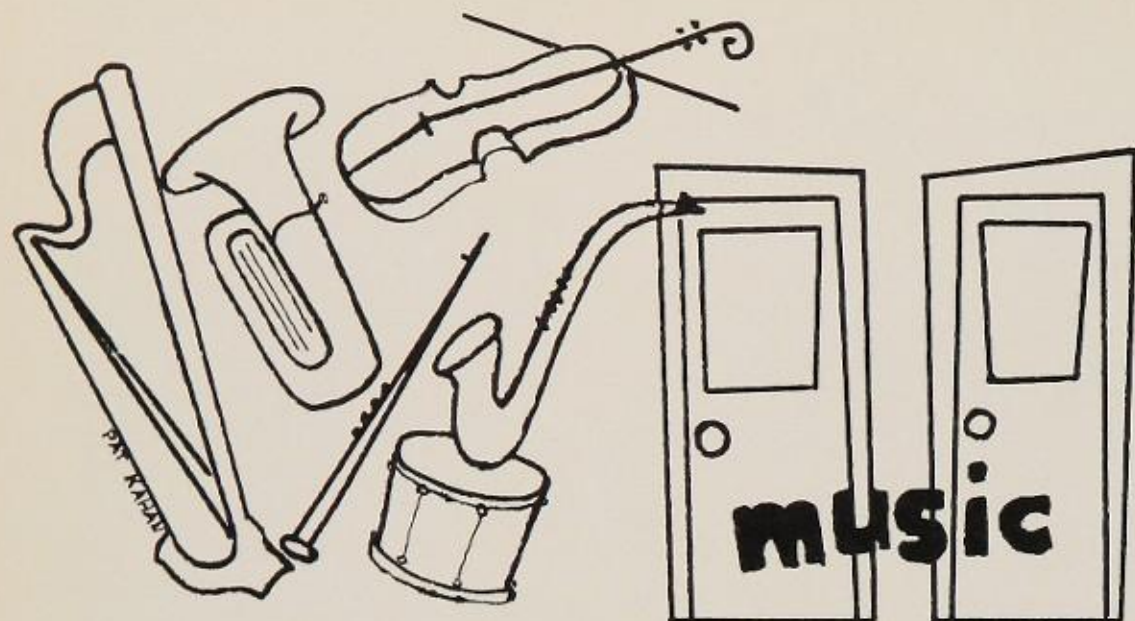

For right now we are entering a whole new era of electric living. The home you start will be easier to take care of, more fun to live in, with help from electric appliances. Complete electric home heating, practical and convenient, is growing every day. Your job will be smoother, too, with electrically operated equipment and an increasing array of electronic devices. Even your education benefits from continuing research in many fields related to electricity. One day, you personally may help to create new and better ways to do things electrically.

So no matter who you are, where you are or what you're doing, your future will continue to be brighter, your life will be lighter through electricity.

DETROIT EDISON

Provides Southeastern Michigan with versatile electric energy

The Music Curriculum of Cass Technical High School is one of the outstanding music programs in this country. The reputation of Cass extends far beyond State Boundaries because of the excellence of its performing groups, which have appeared in many of our major cities.

Any student who graduates from the curriculum can take his place in community musical activities without embarrassment. Many of our graduates are making fine records in the field of Music Education as well as in major symphony orchestras and bands.

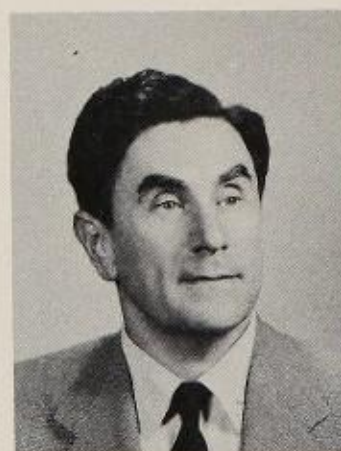

Our Band, Orchestra and Vocal Ensembles have appeared before State and National Music Clubs as well as State and National Conventions. The reputation of Cass is at stake each time we perform for outside groups so for that reason we strive for perfection.

Performing Arts

Students enrolled in Performing Arts are trained in the art of self expression. They are given courses in drama, radio, public speaking, stagecraft and script writing. As radio and television became more a part of the family recreation, the possibility of employment in the area becomes greater. Radio technicians, announcers, script writers and stage technicians are in great demand, not only by the commercial stations, but by the college stations as well.

Students who read well and have an interest in the theater, or related activities, should consider the performing arts curriculum. Graduates from this curriculum should be well qualified to enter the field of Liberal Arts.

HELEN BECKER

Polytechnical Arts

GLENN KLEPINGER

The Polytechnical Curriculum is designed for pupils who have followed a given special curriculum for at least three semesters and have decided to make a change. An opportunity is offered to the worthy student to undertake several types of work aimed at graduation and college entrance.

A transfer to the Polytechnical Curriculum must be approved by the student's parents. The request is then examined by the curriculum head and counselor. If they approve, the request is presented to the Polytechnical Curriculum Head. The student's records must show desirable work habits, cooperation in the practice of school rules and good attendance.

The reasons for a change to the curriculum must be valid. Graduation at the previously anticipated time is not a valid reason to change from a specialized curriculum to the Polytechnic, especially if the student has been doing failing work. Among the valid reasons for transfer are:

- 1) A frank recognition that the specialty previously pursued for three semesters is beyond the ability of the student.
- 2) A change in the desired career to be followed in college or work.

The requirements are:

- 1) a minimum of 170 hours of credit including the ninth grade credits
 - 2) three years of English
 - 3) one year of American History
 - 4) 1/2 year of civics
 - 5) 1/2 year of economics
 - 6) 1 year of biology, chemistry or physics, one year of math, one year of health
- Pupil must spend one year in Poly before graduation.

The Printing department prepares young men for entrance into the printing industry of Detroit on a technical level. It provides opportunities for developing basic skills and a broad knowledge in the standard printing processes which are necessary for entrance and advancement in the various branches of the industry.

The four year curriculum prepares the boys for work in such lines as composition, platen and cylinder press—work design and layout and any of the numerous phases of salesmanship, advertising and business administration which requires some knowledge of printing methods.

Science students at Cass have a unique opportunity, afforded by relatively few high schools in the country, to acquire knowledge and develop laboratory skill in advanced chemistry and biology, as well as in physics and metallurgy.

The challenge of the science curriculum is rigorous, but the success of the typical graduate is indeed most gratifying. Some graduates go directly into industrial laboratory employment, while many continue their preparation in college, leading to fruitful careers in various branches of science.

The Door To The Administration

I can't remember where I put it.

Mr. Baumgartner

Our Boss

Why, Mr. Baumgartner!

Hello, Mr. Heft.

... and Ann told Mary and ...

We like Art.

Diet conscious women always eat Peppy's.

It's regulation.

I can't find the trouble.

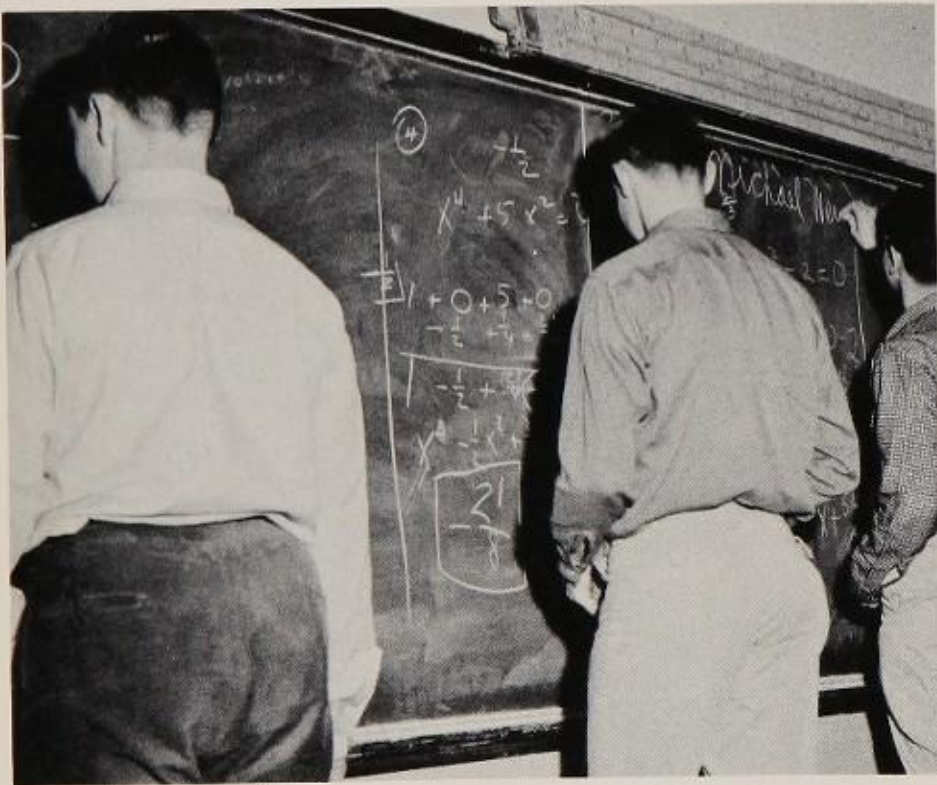

Music, music, music.

All studying?

Playing the role?

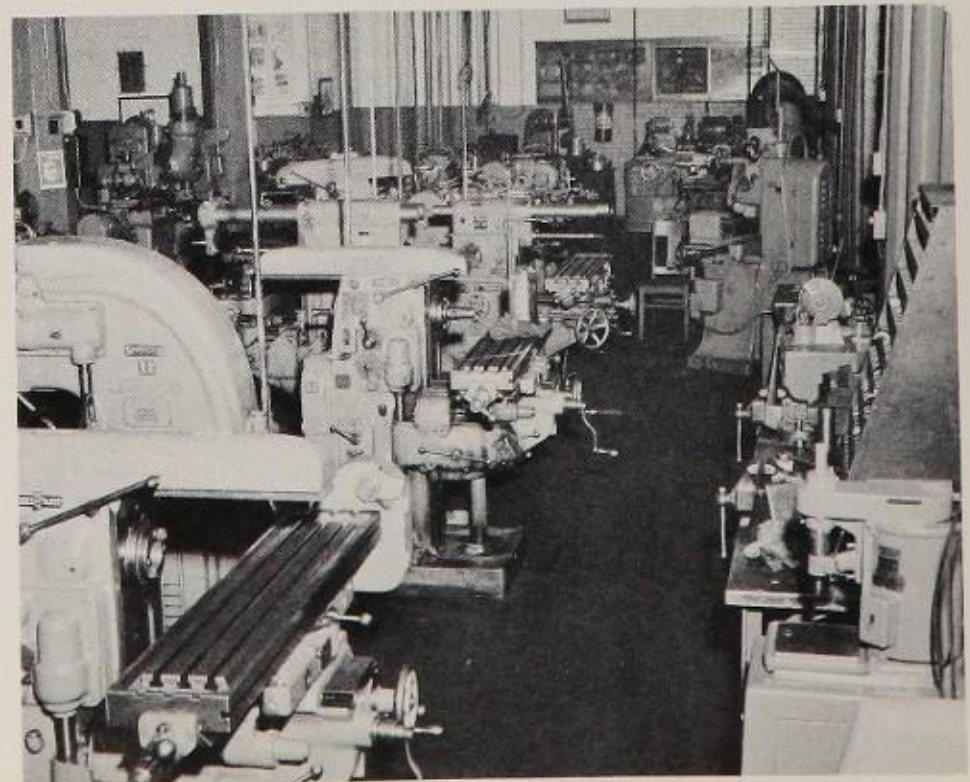

I just can't figure it out.

Grind . . . grind . . . grind.

You have 10 more seconds.

A Machine Shop

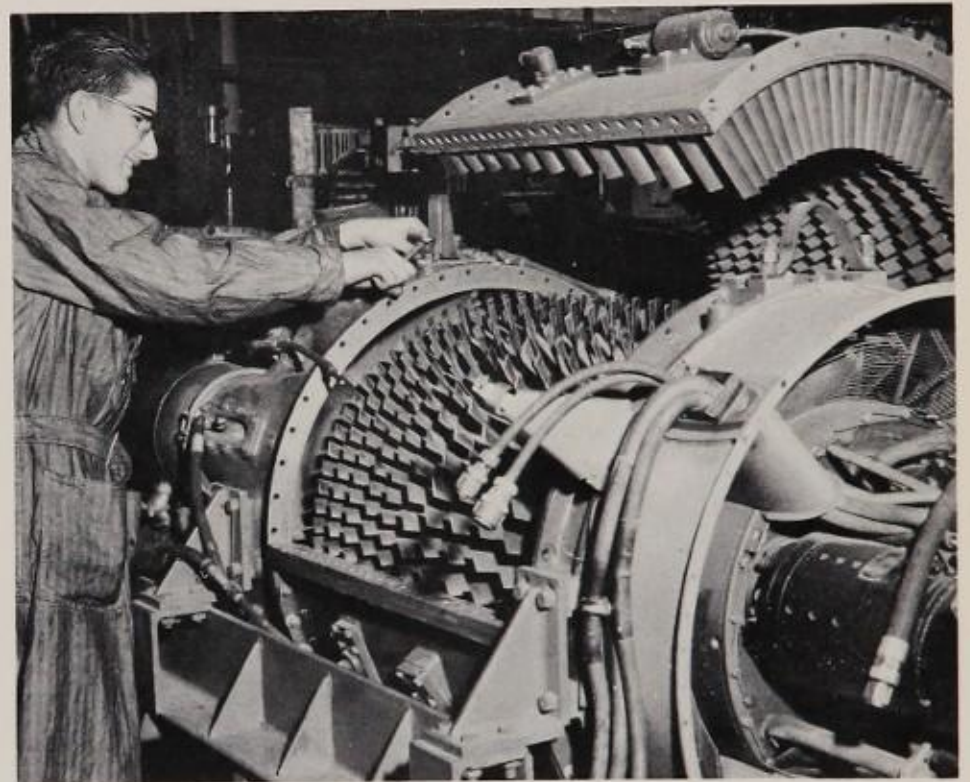

Technician Staff

Fussy people.

What tool did I want?

Watch out — it has teeth.

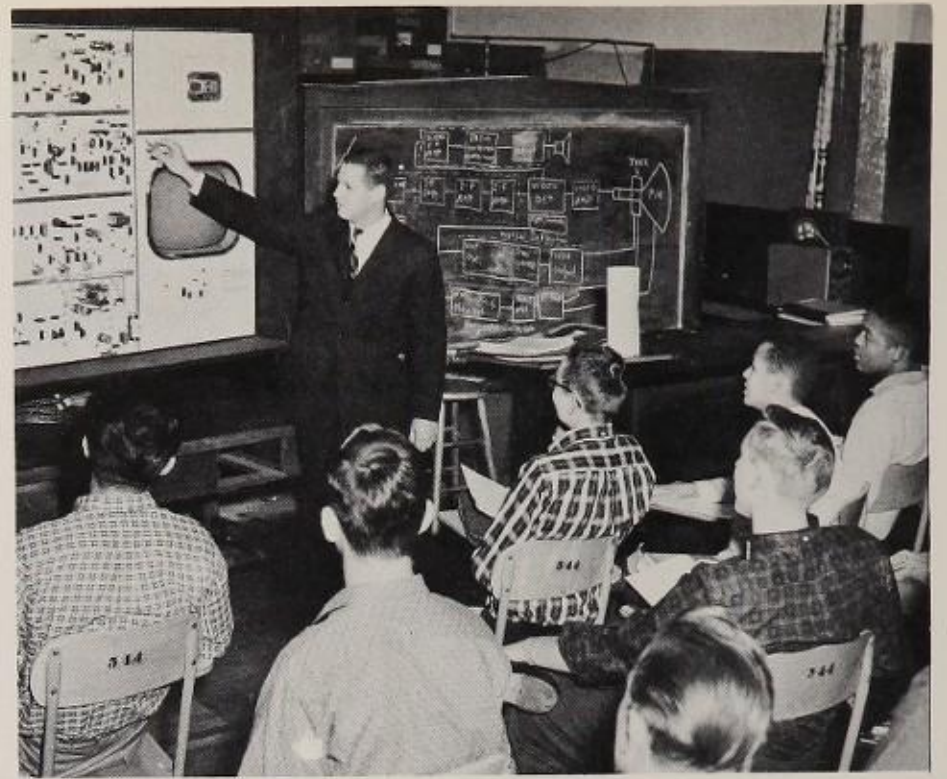

I'm a good safe cracker too.

Anything good today?

And to think it all goes to waist—

Simple TV set.

Senior Skip Day (January Graduates).

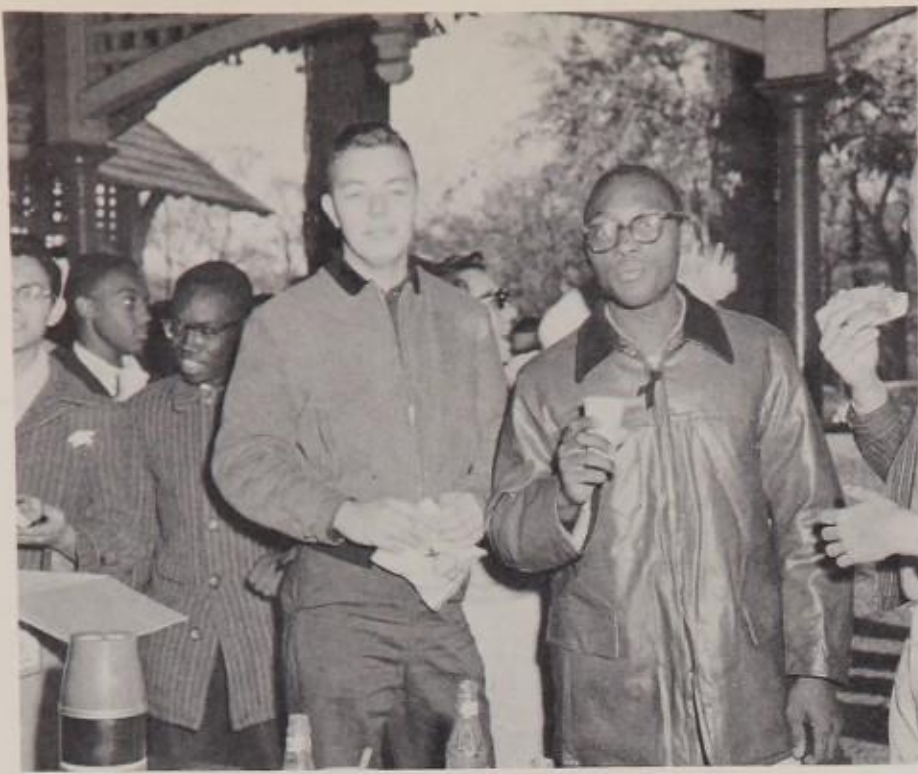

What have we here?

Future artists.

Men at work.

Senior Skip Day (January Graduates),

Well, your's aren't any better!

Press hard, now.

Future engineers.

The Printers.

You should have done . . .

Senior Trip, April, 1960

Across the wide Potomac.

I wonder if George threw the dollar across here?

Hello ceiling . . .

Just wait 'til that alarm goes off!

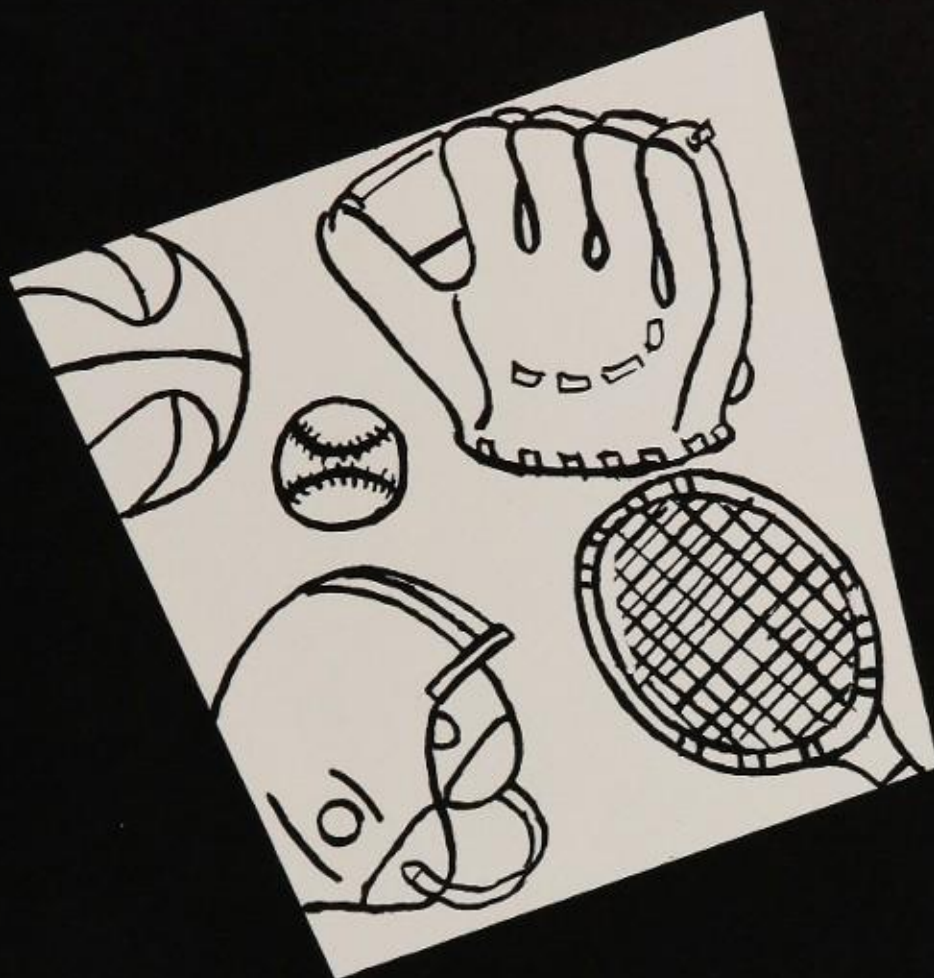

Hubba, hubba, hubba.

E-e-e-e-e-e-e-e-e-e . . .

Sportsmanship Code

We consider all athletes as our guests. We will accept all decisions of the officials. We do not utter abusive or irritating remarks or attempt to rattle an opposing player. We applaud opponents who make good plays; or show good sportsmanship. We strive to win fairly without boasting and lose without excuses. We ask that all players and fans help us live up to this code and so—"May the Best Team Win!"

Just see what we've got, hey, hey
We've got the coach, hey, hey
We've got the team, hey, hey
We've got the pep, hey, hey
We've got the steam, hey, hey
We've got the coach, hey, team, hey
Pep, hey, steam
Give fifteen cheers
For the whole darn team!
Hey rah, rah, rah, rah, rah,
Hey rah, rah, rah, rah, rah,
Hey rah, rah, rah, rah, rah,
Hey rah!

SATISFIED

How's everybody feeling? Satisfied!
'Cause we got a good team. Satisfied!
And we just can't help it. Satisfied!
Now one is one. Satisfied!
And two is two. Satisfied!
But to beat this team. Satisfied!
You've got to do the white and green.
Satisfied!
Hey rah, hey rah, hey rah, rah, rah,
Hey rah, hey rah, hey rah, rah, rah,
Hey rah!

The Triangle staff and I would like to congratulate the graduating seniors and wish them luck in all their future endeavors. We hope this edition of the Triangle will bring back many happy memories in the years to come.

As yearbook editor, I wish to thank all the students, the faculty, and the principal who helped contribute to the 1960 edition. My deepest appreciation goes to Mr. A. Obel without whose experience and inspiration this book might never have been completed. Thanks also to all those who took names in the auditorium and helped the photographer when the staff could not be there, and also thanks to all of the pen and ink students and Mrs. E. Schmidt for the fine art work.

I think all the students of Cass will enjoy the 1960 Triangle as much as we enjoyed putting it together. Good luck to you all.
